DW BHPU Pressure Switch Upgrade

The equipment manufacturer for the Canrig BHPU recommends adding a snubber to the pressure switch connections to improve switch life. This improvement applies to Drawworks 2000 and 3000 BHPUs for serial numbers 72 – 111.

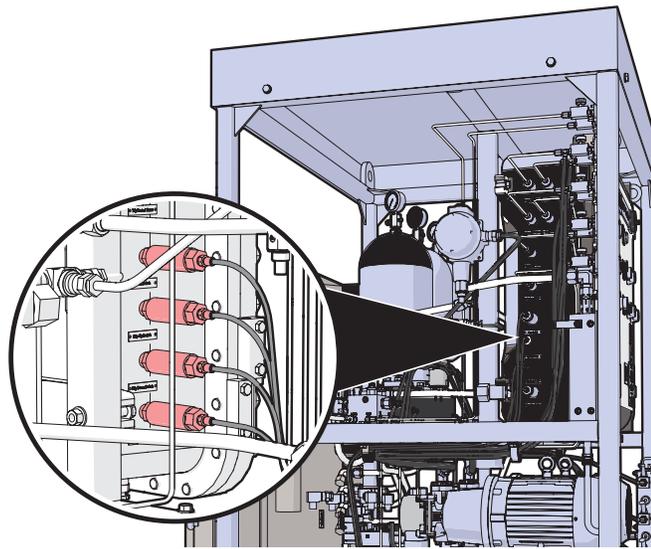

Figure 1: BHPU and Connections

Recommendation

1. Communicate with the rig manager to ensure a good time to make the upgrade.
2. Lock out/Tag out power sources.
3. Install the snubber (Canrig P/N: H14020 - SNUBBER, PRESSURE, 1/4" NPT, SS, DRWKS) between the pressure switch and connection adapter as shown in Figure 2. Torque to 20 ft-lb.
4. Repeat for all four pressure switches.
