

# Canadian Operations Achieve 30% Faster Connection Times with Nabors Automation

## Overview

Akita and Kiwetinohk aimed to improve connection times and enhance drilling efficiency to reduce well cycle times and optimize overall rig performance.

To support this, Nabors Drilling Solutions deployed a suite of advanced technologies, including their **SmartROS**<sup>®</sup>, **RigCLOUD**<sup>®</sup>, **ROCKit**<sup>®</sup> and **SmartDRILL**<sup>®</sup> technologies, developing a collaboration that has been key to driving operational advancements.

## Results

Akita 41 continues to set new benchmarks in drilling automation and operational excellence, including:

- Achieved the **fastest connection times** in a lateral section for Kiwetinohk
- **30%** Weight-to-Weight Time Savings
- **84%** SmartDRILL<sup>®</sup> Utilization

## Case Study Facts

**Location:** Canada

**Drilling Contractor:** Akita Drilling

**Operator:** Kiwetinohk Energy

**Dates:** July 2024 – January 2025

Manual vs. SmartDRILL Connection Times
