

Environmental Policy

Quality, Health, Safety, and Environment

We are committed to the protection of the environment through sustainable resource use and protection of biodiversity and ecosystems.

This commitment includes:

- prevention of pollution on all the sites on which we operate,
- integration of the consideration of environmental concerns into our decision making and activities,
- conservation of natural resources,
- full compliance with all legal or otherwise applicable requirements, and
- the meeting of our stakeholders' requirements globally to maintain industry-recognized environmental standards.

Our Environmental Management System (EMS) ensures conformance with site-specific requirements and provides consistent best practices across our global organization through objectives setting. We are committed to continual improvement of the EMS to further enhance environmental performance.

The company's continued growth and success is rooted in our Purpose, Mission, Vision and Values (PMVV) and our Journey to Excellence principles.

Our Environmental Policy and environmental objectives are reviewed regularly to confirm they are appropriate to our purpose, context, and to the nature, scale and environmental impacts of its activities, products, and services.

We strive to be the best-in-class drilling, drilling solutions, energy transition solutions and manufacturing services provider for the upstream energy industry.
